## ABOUT

MedQIA provides cutting-edge image analysis services in clinical trials for pharmaceutical, biotech, and medical device companies. We are an imaging Contract Research Organization (CRO) specializing in Quantitative Image Analysis and manage all imaging aspects of the clinical trial from planning to completion. We are a highly innovative company with offices in West Los Angeles and the San Francisco N. Bay Area. Our ability to develop and validate novel imaging biomarkers for use in global clinical trials, and our organizational structure consisting of a Clinical Operations team paired with clinicians and scientists in imaging physics, Computer Vision, Biostatistics, Oncology, and Radiology make us a leader in imaging biomarker science.

We are looking for an experienced **Product Manager** with product management experience in the Health Tech Space, a proven track record in building, launching, and maintaining high-scale successful technology products, to work within our Computer Vision & Engineering department.

We offer competitive benefits, along with a matching 401k, Flexible Spending Account, a collaborative work environment, and an exciting opportunity to work with leaders in the QIA field. Unlike the big pharma companies that scale resources depending on a study's success, MedQIA's solid organic growth encourages long-term employment and internal advancement. If you have an entrepreneurial spirit, flexibility, attention to detail, along with strong organizational and planning skills, and would like to work with pioneers in the development and use of computer vision technology for Quantitative Image Analysis, get to know MedQIA at [www.medqia.com](http://www.medqia.com) and apply today.
